**MAX ENVIRONMENTAL TECHNOLOGIES, INC.'S  
YUKON FACILITY  
RECEIVES UPDATED HAZARDOUS WASTE PERMIT**

**PITTSBURGH, February 15, 2005** -- MAX Environmental Technologies, Inc., an environmental services firm, has had its hazardous waste permit renewal application approved by the Pennsylvania Department of Environmental Protection.

The renewed permit will allow MAX to proceed with several facility modifications and upgrades planned at its Yukon, PA hazardous waste treatment, storage and disposal facility. The changes include an increase in storage capacity, upgraded liquids treatment and other operational enhancements that will enable MAX to provide greater environmental protection. The renewed permit will allow MAX to continue with plans to add electric arc furnace dust to the list of wastes it is permitted to handle. The renewed permit is valid for 10 years from the date of issuance.

MAX Environmental Technologies, Inc. specializes in the treatment, storage and disposal of hazardous and non-hazardous industrial waste at facilities in Yukon, PA, and Bulger, PA. The Pittsburgh-based company also offers transportation, waste handling services, construction & remediation services, landfill capping & closure services, and laboratory analysis. MAX was established in 1957.
