

Public Availability Session Held January 2020

Update provided on plans to submit first phase of Hazardous Waste Landfill 7 application to PADEP.

On January 30, MAX hosted a public availability session at the Yukon Fire Hall to provide an update on plans to apply to the Pennsylvania Department of Environmental Protection (PADEP) for a landfill permit. Hazardous Waste Landfill 7 would provide for continued on-site disposal operations as Landfill 6 closes.

MAX held the availability session

to provide for additional discussion before any application materials are submitted to the state. Notices were sent to more than 300 community members and other interested individuals based on requests to expand the mailing list at a public information session in August 2018. Information from that first availability session, as well as from a pre-application

(Continued on page 2)

For more information about MAX environmental permits or proposed Hazardous Waste Landfill 7, contact
 Bob Shawver, President

Hazardous Waste Landfill 7 is proposed to be constructed in the northeastern section of MAX property. Delivery routes to and from the facility will not change.

Public Availability Session Held January 2020 (Continued from page 1)

meeting held with PADEP and Township officials in November 2018, are available at the information repository at the South Huntingdon Township municipal office.

MAX President Bob Shawver told attendees that plans to submit the first phase of application materials in 2019 were delayed to allow for some additional infrastructure upgrades. With additional delays due to

COVID-19, the first phase of application materials has been delayed until later this year.

Phase I of the application will present the results of environmental studies on the suitability of the site location. The study results were presented at the August 2018 meeting and summarized in a fact sheet provided to attendees at both meetings. (A copy of the fact sheet is also available on MAX's website resource center page).

Once the Phase I application materials are submitted to PADEP, the Department will schedule an official public meeting and/or hearing on the project. In the meantime, anyone wishing to view the project information repository may contact South Huntingdon Township. Individuals are also encouraged to contact MAX directly at the emails and phone numbers listed in the insert on Page 1.

MAX President Bob Shawver (far right) and Environmental General Manager Carl Spadaro provided an update on plans to apply for Hazardous Waste Landfill No. 7 and listened to comments at a public information availability session in January 2020 at the Yukon Fire Hall.

COVID-19 Support for Westmoreland County Food Bank

While MAX was among many businesses that experienced negative impacts from COVID-19, we feel very fortunate that we did not shut down our operations or layoff employees. In recognizing the impact of COVID-19, MAX Yukon donated \$500 to the Westmoreland County Food Bank. As September's Hunger Action Month™ approaches, we welcome feedback on opportunities to best serve those in need close to home. If you know someone in need or are hosting a local event, please contact us by

calling the Yukon office at (724) 722.3500 or emailing us at cspadaro@maxenvironmental.com. The Westmoreland County Food Bank asks that anyone who is interested in donating time or resources to the food bank, or anyone in need of assistance, call them at (724) 468-8660. The food bank website is online at: www.westmorelandfoodbank.org and their mailing address is:

Westmoreland County Food Bank
100 Devonshire Drive
Delmont, PA, 15626.

Tire and Electronic Recycling Event Scheduled for August 8, 2020

Drop-off procedures to follow COVID-19 precautions.

MAX's annual community tire and electronics recycling event, typically held around Earth Day but postponed this year due to COVID-19, is scheduled for Saturday, August 8. The event is open to residents from Yukon and immediately surrounding areas.

Westmoreland Cleanways and Recycling is supporting the electronics recycling part of the collection. All types of

electronics, except for appliances, will be accepted. TVs may be any size but must be intact; stripped glass tubes cannot be accepted. "Otherwise, anything with a cord can be accepted for recycling," says Ellen Keefe, Director of Westmoreland Cleanways and Recycling.

Up to eight unwanted tires from passenger cars and light-trucks will be accepted from each resident. Tires from commercial operators cannot be accepted.

For questions related to the recycling event, contact Carl Spadaro, Environmental General Manager, at 412-445-9789 or

cspadaro@maxenvironmental.com.

For more information about electronics recycling or Westmoreland Cleanways and Recycling, visit www.westmorelandcleanways.org. (Note their new location. Also, please call before dropping off items due to potential COVID-19 restrictions.)

Raising the Roof

MAX donations help fund new roof for Yukon Lion's Club House.

Congratulations to the Yukon Lions Club for achieving their long-fought and hard-earned goal of putting a new roof on the Club House!

"I understand there was a lot of spaghetti cooking, pancake flipping, and creative use of Flex Seal while they raised the

necessary funds," said Carl Spadaro, MAX Environmental General Manager. Spadaro observed the new roof in June while attending a ceremony honoring the 1955 West Newton Little League team for their historic state tournament run. (The all-star team had players from teams in Yukon and surrounding communities, some of which made it into Major League Baseball.)

In addition to financial donations of greater than \$6,000 for the project over the last two years, MAX assisted the Lions Club with writing assistance in applying for a grant through the Lions of Pennsylvania Foundation. The Foundation awarded the Club a matching grant, a small part of which will be used to purchase tables that better accommodate elderly and disabled guests.

Congratulations!

Congratulations to Westmoreland Cleanways and Recycling on the opening of their new facility!

355 Pleasant Unity Mutual Road Greensburg, PA 15601

Please call ahead for potential restrictions due to COVID-19.

Truck Delivery Detour Expected to End by this Fall

Construction detours requiring MAX delivery trucks to use Huntingdon Road are expected to end late summer or early fall. "We are working with PennDOT and their contractors to ensure a smooth transition for returning our truck route to its originally approved location from the West Newton interchange on Interstate 70," says Carl Spadaro. "We may also be required to adjust traffic routes for any period of time when both the West Newton and Yukon interchanges are closed." The West Newton interchange construction work is being completed as work on the Yukon interchange progresses.

Closure & Capping Work Started on Landfill 6

MAX has started regrading waste on Landfill 6 to prepare for capping and closure of some of the landfill. Because the work will require disturbing covered waste in some areas, additional precautions are being taken to minimize odors.

Equipment operators are limiting disturbance to small areas and wetting the waste with water sprays where needed. "We are doing this work carefully and cautiously to minimize odors, but if anyone has a complaint about odors they should contact us as soon as possible so that we can take corrective action,"

An artist's rendering of Landfill 6 after capping and vegetation.

said Vice President of Operations Bill Follett. The grading work should be completed by fall and

final capping and closure of these areas completed by the spring of 2021.
