

## Landfill 6 Closure Continues

### Closed areas capped with liner and clean soil

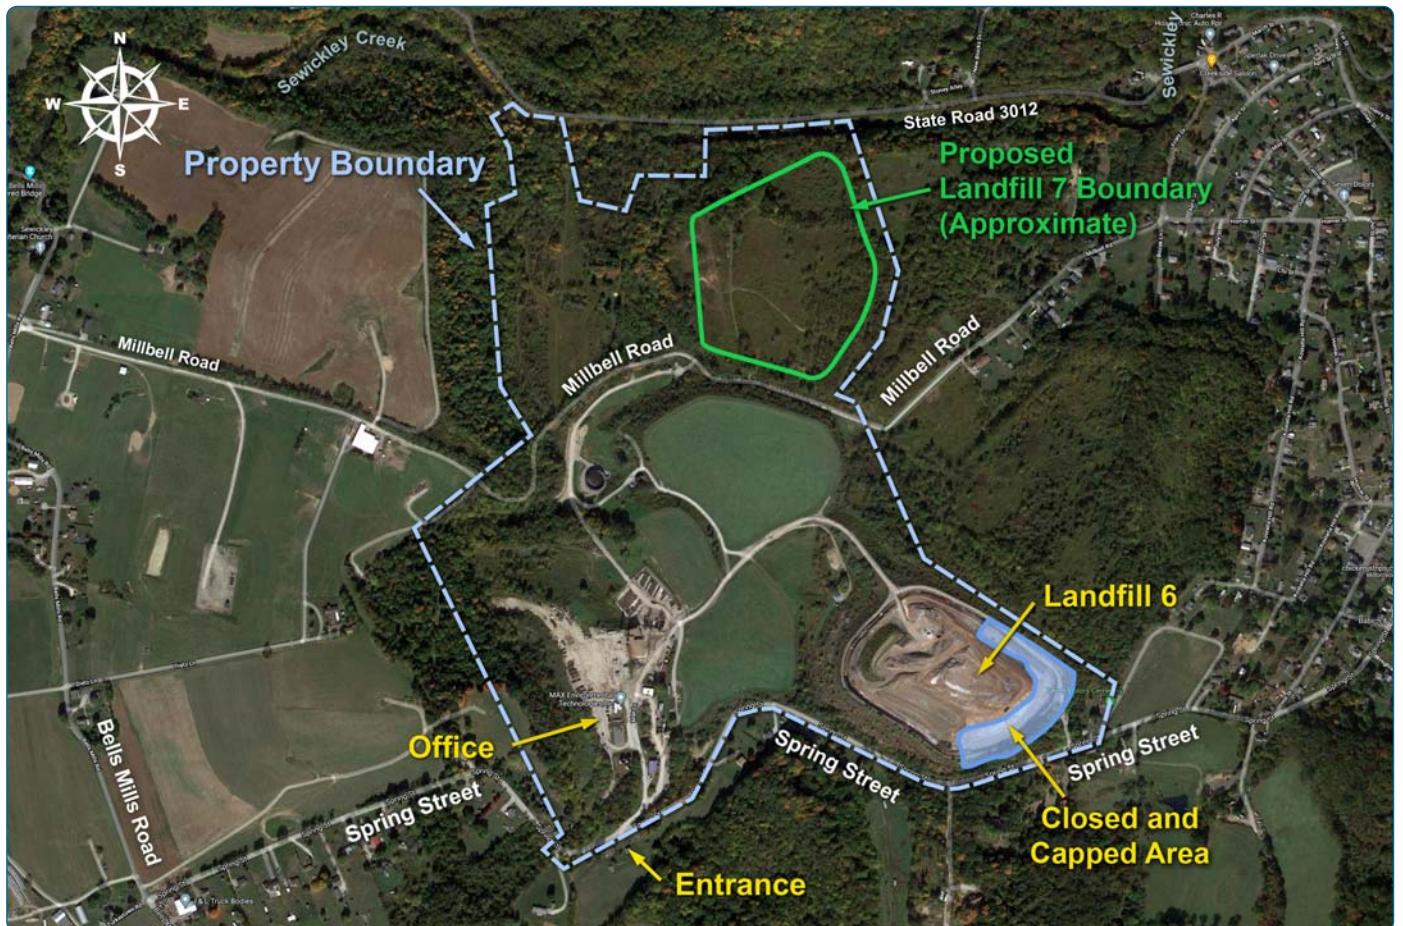

MAX is continuing to close portions of Landfill 6 as the remaining open areas are filled to completion. More than four acres of Landfill 6 were closed this summer. The newly closed area lies in the most southeastern portion of the landfill, closest to Spring Street and the Seven Dolors Cemetery. When an area is closed, it is covered with a geomembrane liner and then topped with two feet of clean soil. The soil is then seeded to maintain permanent

vegetation. Future activities on top of the closed areas are restricted to maintain the integrity of the final cover. Even trees cannot be planted due to the risk of roots penetrating the cap liner. Clean soil for the cap is being taken from a borrow area in the northern segment of MAX's property. The borrow area lies within the proposed Hazardous Waste Landfill 7 boundary, which would require excavation for construction.

Capping of Landfill 6 is expected to continue for about four more years.

*Two feet of clean soil is placed over top of a geomembrane cap liner during closure of landfill areas.*

*More than four acres of Landfill 6 have been closed to date.*

## Annual Event Supports Community Recycling/Cleanup

MAX's annual Earth Day tire and e-waste collection event helped the community recycle more than 400 tires and a roll-off box of e-waste. In addition to wastes collected during a resident drop-off event on May 1, 2021, MAX collected wastes from the 7th Annual Yukon Spring Cleanup coordinated by the Slovenian Club (SNPJ 729 Silverstars) on March 20, 2021. Thank you to everyone who helped to make these recycling events a success.

MAX employees Les Immel, Tyler Hutchinson and Matt Bryan help residents unload tires at the annual Earth Day recycling event on May 1, 2021.

## Application for Hazardous Waste Landfill 7 to be Resubmitted

MAX plans to submit a revised Phase 1 application for proposed Hazardous Waste Landfill 7 to the Pennsylvania Department of Environmental Protection (DEP).

The revision will address the DEP's comments issued to MAX in May, 2021, following the initial submission of the package.

"This summer, we notified neighbors, local government officials and other stakeholders about our planned resubmittal

of the new landfill application," said Environmental Manager Carl Spadaro. "We believe we have addressed all of DEP's comments, which mainly were issues of clarification of the state's hazardous waste landfill siting or location criteria as they apply to our proposal, as well as some administrative matters.

The scope of our proposal has not changed from our original March 2021 permit application."

## Proud Supporter of Big Smiles

MAX is proud to be among the numerous supporters of the annual Yukon Lions Fishing Derby held in May and the Yukon Community Days event held in August. Many thanks to the men and women of Yukon volunteer organizations like the Lions Club, Yukon Fire Company and Slovenian Club for their unwavering commitments to community families.
